PROFESSIONAL LEVEL AIR PLASMA CUTTER

Variable Output

The variable output of the XTP 63 makes it ideal for cutting metals up to 20mm thick. Infinite power control allows the output to be tuned to minimise dross on the cut edges. The pilot arc automatically re-ignites enabling easy cutting of mesh or perforated materials. Non HF ignition minimizes the risk of interference with electronic systems.

Generator Friendly

The XTP 63 is able to cope with inputs which fluctuate by +/- 10% and can be used with the majority of generators. The machine is housed in a metal case with carry handle.
